

# AMAN BISHT

Delhi, India, Phone: +916396969169, Email: [amanbisht1010@gmail.com](mailto:amanbisht1010@gmail.com), GitHub: [viscousCoder](#), LinkedIn: [it-aman](#)

## PROFESSIONAL EXPERIENCE :

---

- **Software Engineer**

- **Celestial System [Sep 2024 - Present]** (Noida)

- Developed dynamic UI components using React.js and Material-UI.
    - Integrated and optimized RESTful APIs to improve data flow between the frontend and backend.
    - Enhanced the performance of React applications by reducing unnecessary re-renders and improving load times.

- **Software Engineer**

- **Costa Cloud [Feb 2024 - Sep 2024]** (Delhi)

- Developed frontend applications using React.js managing state with Redux Toolkit.
    - Collaborated with developers to design and develop a user- friendly front-end interface of LMS (License Management System) application with an optimized user experience, boosted user engagement by 25 percent and reduced bounce rate by 15 percent .
    - Resolve the daily basis issue, bug or any additional feature that provided in Jira by Testing Unit which makes application bug-free and updated to the current requirement by 100 percent .
    - Seamlessly integrated backend APIs into frontend applications, enhancing functionality and user experience, stored data using MongoDB, managing a dataset of over 10,000 records.

- **Software Intern**

- **PurpleTalk India Pvt. Ltd [Oct 2023 - Jan 2024]** (Hyderabad)

- Developed frontend applications using React.js managing state with Redux Toolkit.
    - I also utilized Material-UI to design a clean and efficient user interface, aligning with modern UI standard.

## PROJECTS :

---

- **HITACHI FSM – Field Worker Application (Enterprise Project)**

- **Client: Hitachi Energy**

- Worked on an enterprise Field Service Management (FSM) Field Worker application used by technicians for on-site service operations.
    - Integrated frontend modules with backend APIs to manage service tasks, assets, and technician updates.
    - Collaborated with QA and backend teams to fix production issues and improve overall system reliability.
    - Focused on performance optimization and stable data rendering for field usage scenarios.

- **CareCorp AI Voice Agent – HR Automation System (Enterprise Project)**

- **Client: CareCorp**

- AI voice bot using Azure Communication Services.
    - Speech-to-Text, Text-to-Speech, and GPT-based responses.
    - Real-time call handling with Azure Functions.

- **DocuTalk – Intelligent Q&A System (Commercial Product Project)**

- **Developed at Costa Cloud**

- Designed and developed a Q&A application capable of retrieving accurate answers from specific files and folder-based data sources.
    - Built a user-friendly frontend focused on fast search, clarity, and usability.
    - Optimized backend data processing and query handling to improve response accuracy and performance.
    - Achieved approximately 80% improvement in data handling efficiency and answer accuracy.
    - Implemented AI-based logic using a Mitral model to enhance contextual understanding.
    - Followed modular architecture and clean code practices for future client customization.

- **License Management System (LMS) – Web Application**
  - **Commercial Product Project**
    - Developed the frontend for a License Management System designed for enterprise usage.
    - Built a streamlined and intuitive UI to simplify license tracking and management workflows.
    - Improved code efficiency and component reusability across the application.
    - Integrated ThemeCreama to ensure consistent design and branding.
    - Achieved approximately 70% improvement in interface performance and usability.
    - Designed the system to be easily customizable for different client requirements.

**SKILLS :**

---

- **Languages :** Javascript, C, TypeScript,
- **Libraries/Frameworks :** React.JS, Redux, Redux-Toolkit, HTML, CSS, Bootstrap, Git, Material-UI, Node.js, Typescript
- **Database :** PostgreSQL, MongoDB
- **Soft-Skills:** Team Player, Problem Solving, Communication

**EDUCATION :**

---

- |                                                                         |                        |
|-------------------------------------------------------------------------|------------------------|
| • Institute of Technology, Gopeshwar (Uttarakhand Technical University) | Bachelor of Technology |
